Panel Discussion

SOLVEX, INC.

1475 MILLER DRIVE COLTON, CALIFORNIA 92324 PHONE (714) 825-6047

"THE SOLVEX PLANT IS LOCATED IN COLTON, CALIF.; ITS PRIMARY FUNCTION IS THAT OF RECOVERING BEESWAX FROM SLUM-GUM WASTE. THE PROCESS IS ABLE TO SEPARATE UNDESIRABLE SOLIDS AND COLORS FROM SLUM-GUM WASTE AND RECOVER BEESWAX. BEEKEEPERS WHO PROCESS THEIR OWN CAPPINGS ARE RELIEVED OF THE OLD PROBLEM OF DISPOSING OF SLUM-GUM WASTES AND WILL, NO DOUBT, BE HAPPY TO SELL THEIR HONEY-BEESWAX PROCESSING WASTES TO SOLVEX, INC. IT SHOULD BE EMPHASIZED THAT THE SOLID CAKE, AS WELL AS THE SEMI-LIQUID, SLUM-GUM WASTES ARE DESIRABLE FOR PROCESSING.

"BRIEFLY, THE PROCESS INVOLVES CHARGING A 4,000-GALLON STEEL TANK (THE CORE OF A THREE-STORY-TALL EQUIPMENT AND MACHINERY COMPLEX) WITH THE WASTE MATERIAL. AFTER CHARGING WITH RAW MATERIAL, A SOLVENT IS INTRODUCED INTO THE SEALED TANK; THIS MIXTURE IS STIRRED, HEAT IS APPLIED THROUGH THE STEAM JACKET OF THE TANK. THIS IS A SLOW PROCESS, AND AFTER A FEW HOURS, THE LIQUID SOLUTION IS ALLOWED TO SEEP TO THAT THE SOLVENT EVAPORATES TO A SOLVENT RECOVERY HEAT EXCHANGER ON THE TOP STORY OF THE PLANT. NOW, ONLY WAX REMAINS IN THE LOWER PORTION OF THE TANK; IN ITS HOT LIQUID STATE THE WAX IS PIPED TO MOLDS; THE COOLED WAX IS REMOVED FROM THE MOLDS AND PACKAGED FOR CONVENIENT HANDLING"

PROGRAM

Saturday — October 25th

MORNING SESSION
